Summary

Hi I'm a software engineer with **4+ years** of experience in frontend development, current tech stack is: **React, Javascript, Typescript**.

Worked in 3 software companies on different project stages: requirements analysis, UI and product design, choosing tech stack, architecture design, and software development.

Skills

- | | | | | |
|--------------|--------------|-------------------|---------------|----------|
| ✓ React.js | ✓ Redux | ✓ Cesium.js | ✓ Material-UI | ✓ SASS |
| ✓ Typescript | ✓ MobX | ✓ Design patterns | ✓ Bootstrap | ✓ Git |
| ✓ Javascript | ✓ Rest-API | ✓ OOP | ✓ HTML | ✓ Vue.js |
| ✓ Next.js | ✓ Leaflet.js | ✓ Webpack | ✓ CSS | |

Experience

Frontend Developer | *March 2019 - Present*

SHARIF HAMRAH PAZHOOHAN

- Reviewed performance optimization strategies for adding large amounts of geospatial data to a Leaflet map, including tile-based loading, data clustering, and canvas rendering, resulting in a 30% improvement in rendering speed.
- Proposed and implemented the use of web workers for data clustering in a large heatmap visualization, leading to a 50% reduction in memory usage and a smoother user experience.
- Utilized Cesium's APIs to integrate geospatial data layers and create dynamic visualizations for geospatial applications.
- Optimized performance of 3D rendering and interactions for smooth user experience across various devices.

Frontend Developer | *December 2020 - December 2021*

HIMART (*Mihan Industrial Group*)

- Leveraged Webpack's `TreeShakingPlugin` to eliminate unused code within modules, resulting in a 20% reduction in bundle size and a 15% improvement in initial load time.
- Implemented dynamic imports and React's `Suspense` component to lazily load feature-specific code, enabling users to interact with core functionalities quickly while non-essential features download in the background.
- Evaluated advanced sorting methods like personalized recommendations and product-specific filters. Prioritized user needs and technical feasibility while considering future scalability.

Frontend Developer | *September 2021 - December 2021*

DADE KAVAN | ANDISHE BARTAR

- Successfully led the redesign of food ordering process resulting improve user engagement.

Education

Bachelor of **Software Engineering**, Sadra University, Tehran | *2016 - 2020*
